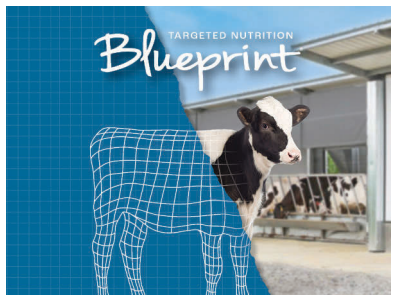
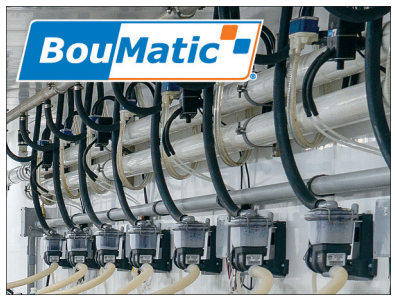
2026 Winter Showcase Product Spotlight

HUBBARD
an Alltech company



Blueprint Dairy Calf & Heifer Program
The Blueprint dairy calf and heifer products are first-of-their-kind, designed to allow calves to reach their genetic potential and enhance digestion and nutrient intake while promoting natural defenses. Founded on the belief that the form of nutrition delivery is just as important as the level of supplementation, Blueprint products are made with 100% Bioplex organic trace minerals for superior bioavailability to support exceptional health and performance. To learn more, visit **www.hubbardfeeds.com/brand/blueprint**.

BouMatic



The MagStream meter ensures a continuous and completely free milk flow and air flow. This meter has the lowest occurrence of vacuum drops and fluctuations of any meter on the market today. Thanks to advanced technologies for power management, data communication and recording, it is the first milk meter that is completely wireless. The MagStream records milk yield and flow rate of individual cows during each milking with the highest accuracy. Learn more at **boumatic.com/magstream**.

COWMANAGER®

New **Find my Cow Flash** helps you quickly locate the right animal—whether she's in heat, ill or in the wrong pen—saving labor and boosting daily efficiency. A flashing LED light on the CowManager ear sensor makes identification simple. Just activate it from your CowManager app or desktop and locate the cow, heifer or calf soon after. Designed for herds of all sizes, **Find my Cow Flash** keeps your operation running smoothly. Learn more: **https://bit.ly/SPOTFMCF25**; World Ag Expo Booth 6513.

KUHN

A Mixer for Every Operation

KUHN Knight VT 200 Series twin-auger Vertical Maxx® mixers are ideal for dairy producers looking to put a quality ration in front of their animals. Four models available, the VT 232, VT 244, VT 256 and VT 268, offer capacities that range from 320 to 760 ft^3. To best meet your mixing needs, choose from trailer or truck models. To learn more visit our website: **www.kuhn.com**.

TRIOLIET
FEEDING TECHNOLOGY

Accurate and consistent feeding and save on fuel cost; the advantages of auto stationary feed mixers
Efficiency, accuracy, consistency and large capacity are the key advantages of stationary mixing. With automatic- or manual control, there is a solution for every farm. Our stationary mixers are 100% electric driven and come with programmable frequency drives, providing you with the highest energy efficiency possible. Check out our stationary program: **www.trioliet.us**

evolution®
A Conewango Division

RST-Driver+™
Save labor, time and money with the latest innovation from Evolution®, a division of Conewango™. The all-new RST-Driver+™ is pre-assembled in a disposable shell, so you'll never assemble, wash or reload again. Ideal for large-herd dairies, this patent-pending liner offers same high-speed, low-slip benefits as the original RST-Driver... PLUS more! Transitional barrel outperforms top square and triangular barreled competitors in trials. Low mouthpiece vacuum ensures cow comfort. Durable up to 2,500 milkings. Details at **conewango.com/rst-driver-plus**.

iff

Looking for science driven solutions to your dairy challenges?
IFF delivers innovative feed additives for dairy producers, focusing on enhancing gut and rumen health to support optimal performance. Our products, including Betafin® natural betaine and our Omni-Bos™ family of probiotic gut health solutions and feed enzymes, help drive efficiency, productivity and performance in dairy operations. Learn more about how our science-backed approach can benefit your animals and your bottom line: **iff.com/animal-nutrition/ruminant**.

PIONEER®
HUNDRED YEARS

Maximize the value of your on-farm feed with Pioneer® brand forages. With TonnEdge corn silage hybrids, Pioneer brand Plenish® high oleic soybeans, industry-leading inoculants, and exclusive management tools, dairy producers get high yield potential and the highest-quality forages. It all comes with unmatched local support to help you improve operational efficiency, whole-farm performance, and profit potential. Plant Pioneer brand forages in the 100th year of Pioneer and plant your best year yet.

PIPPING CONCRETE INC.
AGRICULTURAL CONCRETE

Since 1985, Pipping Concrete has focused on agricultural concrete solutions. We've constructed hundreds of waste storage facilities, installed tens of thousands of feet of bunker walls, built over 45 anaerobic digesters, and poured hundreds of thousands of yards of concrete. Based in Wisconsin but mobile across the U.S., we've completed more than 500 projects for farms in New York, Florida, Washington, California, and beyond, providing durable, long-lasting structures. Visit us at **pippingconcrete.com** to learn more!

VALMETAL

Pasteurization ensures pathogen-free bedding. Installed after the separator, the Xpress-PS provides mixing and aerobic heating to produce safe, pasteurized green bedding. Available in four models (4,000 to 40,000 lb/day), it improves cow comfort, delivers stable, high-quality material, and reduces the use and storage of traditional bedding. In sandy environments, it further lowers sand content in bedding and flush water, reducing equipment wear, minimizing maintenance, and extending overall system life.

2026 Winter Showcase Product Spotlight

HUVEPHARMA®

We all recognize the signs of Coccidiosis when it rears its ugly head with the bloody diarrhea, but it is estimated that most production losses are subclinical. That is why many times Coccidiosis is referred to as the “Forgotten Disease’ or others will call it the ‘Silent Thief’ even though it is estimated that dairymen have production losses in the millions of dollars per year from coccidia.

Fritsch EQUIPMENT & SERVICES LLC

Experience next-level cow comfort with new Condon Stalls, now available from Fritsch Equipment. Built for durability, stability and long-term performance, these stalls deliver a safer, more comfortable resting space. Pair them with Mayo Mattresses for a complete comfort system that increases lying time, reduces injuries and keeps cows cleaner and healthier. Stronger stalls. Softer beds. Better performance. Elevate your herd’s well-being and productivity—upgrade your barn today. Explore the full lineup of stall solutions: **https://bit.ly/SPOTCONDON25**

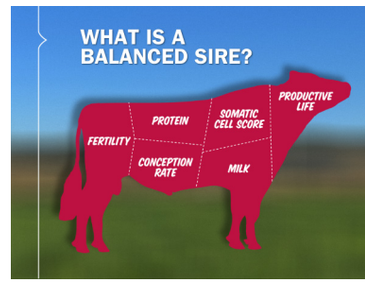
novonesis

Bovamine® Dairy Plus

Chr. Hansen and Novozymes have joined forces to become Novonesis. Together, we’re committed to delivering biosolutions that support animal productivity and sustainability. With over 100 years of expertise, we scientifically select probiotic strains for our range of direct-fed microbial products, like Bovamine Dairy Plus probiotic. Talk to us about maximizing feed efficiency and support the health of your dairy herd. Or visit **Novonesis.com**.

ST.JACOBS Brought to you by ABS®



Balanced Sires Drive Profitability

Balance means having good or equal amounts of all the necessary parts of something. Genetics from balanced sires transmit well for all of the key profit traits and are easy to use on dairies. Choose from a lineup of all-arounder bulls with lots of strengths and very few weaknesses. Where form meets function.

HOARD'S DAIRYMAN FARM CREAMERY™

Hoard’s Dairyman Farm Creamery cheese is crafted with milk from one of the most storied dairy herds in the country. It is the oldest continuously registered Guernsey herd in North America and has been a consistent award winner for quality milk production. We are proud of our dairy cows and the milk they provide for our extraordinary cheese, and we’re privileged to be carrying on the tradition of excellence W. D. Hoard established in 1899. **www.HoardsCreamery.com**.
