

HOARD'S DAIRYMAN

Winter Showcase Product Spotlight

Hard pulls or cold births are challenging. Calf Perk® is a quick stimulant that provides an immediate energy boost for challenged newborns—increasing their ability to stand and begin eating. Calf Perk's unique, patented formulation ensures rapid absorption, maximizing calf vigor, suckle reflex and stimulating heart rate, breathing and body temperature. Awaken the Future with Calf Perk. CalfPerk.com.

Allflex Matched Sets are linked by the same ID number. This makes it easy to use and compare animal information collected using Allflex Tissue Sampling Units, EID tags or visual ID tags. For example, the common identifier ties animal ID to health protocols or genetic testing reports, which can help in management of breeding, health and progeny records. Matched Sets simplify many complex steps, saving time, improving accuracy and streamlining record keeping. Learn more at <https://www.youtube.com/watch?v=im6wl0xtMFg>.

Pushing Past the Competition. The KUHN Knight HP 170 M hydraulic push box spreader features the proven ProPush® design customers have come to love, now with the addition of a moving floor and increased capacity (700 ft³). The HP 170 M, paired with VertiSpread® vertical beaters, is designed to haul and spread solid materials from dairies and feedlots, including gutter manure, yard scrapings, bedding pack and feedlot manure. The hydraulic push-type design means no apron chains, fewer moving parts and dependable service life. www.kuhn.com.

Methionine, an essential nutrient, is typically the foremost limiting amino acid influencing the performance and profitability of dairy cows. Meeting methionine requirements results in heightened production, improved metabolic health, and enhanced reproductive performance. Smartamine®M, Adisseo's rumen-protect methionine with a unique pH-sensitive polymer, shields the amino acid during rumen passage, guaranteeing its release in the abomasum and efficient absorption in the small intestine. Learn how to protect your margins and calculate IOFC with Smartamine®M at Milkpay.com.

The innovative **DM3X+ ROTARY PARLOR**, offering robust construction for enduring durability. With advanced machine learning algorithms, it optimizes milking efficiency, accommodating more cows per stall to maximize throughput. This system significantly reduces manual labor, boosting overall farm efficiency. Customization options, accurate Cow-ID, and comprehensive data tracking ensure optimal performance. Versatile and adaptable, the DM3X+ stands as the future of dairy farming — efficient, productive, and built to last. **To learn more, email: usainfo@dairymaster.com or phone +1 717-979-6035.**

When you feed BOVAMINE® Dairy Plus to your herd, you're putting the power of good bacteria to work. Daily feeding of BOVAMINE Dairy Plus supports normal functions of the rumen and intestinal tract — digestion, absorption, barrier functions and immunity — and keeps your cows healthy and productive. It's the power of good bacteria at work. **For more information scan this QR code or see our ad on page 87.**

What you put in is key to what you get out when it comes to dairy cattle milk production and milk fat content. Triple-nutrient whole cottonseed is a feed ingredient with more going for it than you may imagine. It's a reliable source of the protein, fat and fiber dairy cows need to be productive members of their herd. Producer testimonials, the Cottonseed Marketplace and more are available at WholeCottonseed.com/Dear-Nutritionist/.

Field Proven Results from Pioneer. With over 95 years' worth of industry expertise, the complete forages package from Pioneer delivers unrivaled performance. The proven genetics inside each bag of Pioneer® brand corn silage products, including BovaIta® BMR hybrids, offer results that match your needs and help maximize production. Discover more at Pioneer.com/Forages.

DynOmik™

Adisseo introduces DynOmik™, a disruptive new feed additive. DynOmik™, a disruptive new feed additive from Adisseo, increases dry matter intake and milk production from transition through peak lactation. Research reveals its positive impacts on nutrient intake and milk production. DynOmik influences the production of volatile fatty acids and stabilizes rumen pH. It contributes to sustainability through decreased carbon footprints. As milk production per cow increases, methane production per unit of milk decreases. DynOmik is pelletable with a recommended feeding rate of 5g/head/day. www.adisseo.com.

Prepared to Impress! The all-new KRONE Gen 5 BiG PACK baler with performance-boosting updates brings baling to a new level of excellence! With a 20% longer chamber, more control over bale density, easier maintenance, and no more scrap twine ends thanks to the standard double-knotter, the Gen 5 baler is sure to impress. Enjoy 2.49% financing for up to 60 months on any BiG Pack large square baler. Hurry into your dealer before the offer ends on 3/31/2024! www.krone-northamerica.com.

Native Microbials spent years researching the dairy cow rumen to identify the microbes most associated with high performing cows. The result is Galaxis™ Frontier, the only product made with a consortia of live microbes native to the rumen. The product increases the abundance of beneficial microbes in the rumen, helping to optimize digestion for more energy. And more energy means lactating cows do more of what they do best. GalaxisFrontier.com.

Get the ultimate parlor for ruggedness and durability with the comfort you come to expect from BouMatic with the Xcalibur 360EX 2.0 rotary milking system. With new features for better serviceability and cow comfort, our rotary has reached a whole new level of performance. A smooth entrance and exit provide your herd a calm and peaceful environment. Available in deck sizes of 40 to 150 stalls. Learn more at boumatic.com/Xcalibur2.0.

Interested in replacing copper on your dairy? **HOOF-ZINK**, a concentrated liquid Zinc formula, is highly effective in preventing bacteria that causes heel warts and hoof rot. **HOOF-ZINK** is an easy to use immediate footbath solution, when added with water. Just pour it in your footbath and walk away. **HOOF-ZINK** provides more cow passes per footbath resulting in lower \$/cow. Ready to make the switch? **Scan this QR code for more information and request a quote.**

Evolution® RST-Driver™: Improved Performance or Your Money Back! This revolutionary, transitional barrel liner delivers peak performance for large-herd dairy operations. Engineered for high speed, low slip and ease of use, the RST-Driver has proven itself a winner in test trials vs. leading competitors. The innovative design minimizes mouthpiece vacuum and promotes teat-end health. Available with and without venting. RST-Driver has quickly become the premier choice among Conewango's popular Evolution family of liners. **800.828.9258** www.evolutionliners.com.

We all recognize the signs of Coccidiosis when it rears its ugly head with the bloody diarrhea, but it is estimated that most production losses are subclinical. That is why many times Coccidiosis is referred to as the "Forgotten Disease" or others will call it the 'Silent Thief' even though it is estimated that dairymen have production losses in the millions of dollars per year from coccidia. www.huvepharma.us.

Tired of replacing plastic EID tags? Time to switch to Stainless Steel. Shearwell Data is the first company to offer ranchers a metal EID tag for cattle. The MET tag combines the durability of a metal tag with the benefits of an EID tag. It has been used on farms around the country, with huge success. Made from Stainless Steel, built in HDX RFID chip. Steel stays in! Call 1-800-778-6014. www.shearwell.com.

Tired of seeing your cow slip, trip and fall? Then you need to try the Legend Rubber AgriMat! Legend Rubber AgriMat comes with one of the highest tensile strengths in the industry and comes in a standard size of 4' wide x 6' long. Offering the High Profile AgriMat with the studded base, as well as the High / Low profile combination mat, take your pick of textures on the farm! www.legendrubber.ca.

Does hypocalcemia wear you out? There's no longer any reason to use the four-letter word. Take the negativity out of your prefresh program with X-Zelit®, the novel, uncomplicated, science-based feed ingredient for preventing hypocalcemia. X-Zelit is research proven through university studies and on-farm trials to ensure high blood calcium concentrations and optimal fresh cow health. Enjoy fewer cow touches and more control of your transition cow pen. Manage hypocalcemia differently – **learn more at Protekta.com**.

LinPRO-R, our Omega-3 feed ingredient, developed specifically for ruminants, alters the activation status of the immune system and produces an anti-inflammatory response. Omega-3 fatty acids are less abundant in dairy diets and can help counterbalance the Omega-6's, which amplify inflammation, especially during the transition period. Proper energy balance during the transition period provides multiple benefits, including optimized immunity, improved conception and enhanced milk production. Learn more at www.otfarms.com. Ph: 1.306.543.4777.

Saving on feed- and fuel cost; the advantages of stationary feed mixers Efficiency, accuracy, consistency and large capacity are the key advantages of stationary mixing. With automatic- or manual control, there is a solution for every farm. Our stationary mixers are 100% electric driven and come with programmable frequency drives, providing you with the highest energy efficiency possible. Check out our stationary program: www.trioliet.us.

Developed using the latest calf research, Tri-Start Jr+ is designed to help protect pre-weaned calves against pathogens, enhance gut health and boost digestive and immune system development. Tri-Start Jr+ is perfect for jumpstarting a newborn calf or anytime a pre-weaned calf experiences health, environmental or management challenges. Available in single- and multi-dose applicators and with green traceability. To learn more, contact a Select Sires representative or visit <https://www.selectsires.com/products/build-a-better-heifer>.

There's nothing special about a NutriTek® cow - except everything! She navigates calving, pregnancy, and dry-off with ease, producing high-quality milk along the way. Optimized gut health and immune strength translate into healthy animals that perform to their genetic potential. NutriTek postbiotic is Diamond V's next-generation immune health dairy cattle feed additive that helps promote overall health and wellness through efficient use of nutrients for greater profitability – the goal of every dairy! www.DiamondV.com/Nutritek.
