

2024 Fall Showcase Product Spotlight

Shop popular calf accessories like our pails and bottles at CalfHutchShop.com by Agri-Plastics. Our bottles are the heaviest in the industry and don't collapse. Our pails are made with thick, durable plastic. A smooth curved interior means easy access and easy cleaning. All of our products are made from durable materials which help save labor costs and improve your calves' overall health. And if you spend \$130 or more, get FREE shipping. Visit CalfHutchShop.com today!

THE LIVESTOCK COMFORT SPECIALIST

Save sand, equipment, and money with the Agri-Grid Sand Saver 2.0 with the NEW Lok-Seal System. The unique covered interlock minimizes sand infiltration and ensures quick installation. The Grid can cut your bedding usage by up to 50%! By providing a permeable sub base, there is less time spent leveling the stall bed and the bed stays more even leading to higher stall occupancy. Contact us at 888-231-3575 or info@agri-comfort.com. *Patent Pending.

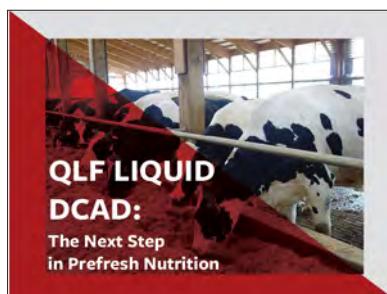

UP TO \$5,000 OFF SELECT KUHN MANURE SPREADERS – As the worldwide leader in manure spreading technology, KUHN offers a wide variety of side-discharge and rear-discharge manure spreaders designed and built to meet the needs of any farming or industrial operation. Enjoy \$5,000 off select manure spreaders. Visit your local KUHN dealer to take advantage of this special offer or visit our website. Offer ends December 6, 2024. Kuhn-usa.com/coupons.

Make your Forage BULLETPROOF BULLETPROOF® forage preservatives enhance fermentation through the addition of antioxidants, enzymes and sugar sources. This unique combination allows for more rapid and efficient fermentation as well as less heating and faster curing in hay bales. BULLETPROOF® consistently improves quality of hay, ensiled forages, high-moisture grains and wrapped bales. Link: <https://bit.ly/bulletproofyourforage>.

QLF DCAD product line offers a palatable and consistent source of dietary anions offering superior palatability, mineral solubility, and bioavailability. **Convenience:** Adjust feed rates easily without changing the protein mix. **Accuracy:** Simple and precise loading into the TMR. **Enhanced Nutrition:** Boosts microbial protein production, improves TMR palatability, and enhances forage digestibility. **Mineral Delivery:** Highly bioavailable calcium and magnesium. **Improved Intake:** Better forage and energy intake reduces the risk of ketosis and DA.

The Evolution® SST-Driver™ is a new high-performance silicone liner just launched by Conewango Products Corp. Designed specifically for large-herd operations, the SST-Driver comes pre-loaded in a lightweight single-use shell, offering significant savings of labor, time and money. Features a transitional round-to-square barrel with non-round advantages and a patented square hackle to prevent twisting. Offers extended service life, with successful testing up to 6,000 milkings. Vented and non-vented options available. Learn more at evolution-liners.com/sst-driver.

Treat heat stress from the inside. Maintaining animal health, production and growth is vital to your profitability. Bovine Accellyte II is a specialized electrolyte for periods of stress, rehydration and pre-hydration during events including extreme temperatures, transport, calving, illness or feed changes. Bovine Accellyte II promotes feed and water intake and restores electrolyte functions and water retention to prevent losses due to dehydration. To learn more, visit www.selectsires.com/maximize-cow-performance or contact a Select Sires representative.

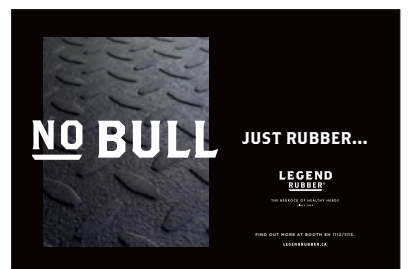

LinPRO-R, our Omega-3 feed ingredient, developed specifically for ruminants, alters the activation status of the immune system and produces an anti-inflammatory response. Omega-3 fatty acids are less abundant in dairy diets and can help counterbalance the Omega-6's, which amplify inflammation, especially during the transition period. Proper energy balance during the transition period provides multiple benefits, including optimized immunity, improved conception and enhanced milk production. Learn more at www.otfarms.com. Ph: 1.306.543.4777

Dairy cows need quality lying time, protection from heat stress, and excellent support of all pressure points. The AQUASTAR ULTIMATE delivers all this and much more ~ the softest and most tissue friendly lying surface in the world. Its water pouch assures constant heat transfer, thus providing greater comfort and protection from heat stress. And, you can avoid the headache, expense and backbreaking labor involved in dealing with sand. Visit us at www.bioret-corp.com or call 519-320-0902.

Here at Legend Rubber, we offer durable walkway mats, cow beds, and slat mats engineered for stability, comfort, and protection. With over 15 years experience in the dairy industry, we provide solutions that enhance herd comfort, boost productivity, and reduce injury risks for animals and staff. There's rubber, and there's Legend Rubber – The Bedrock of Healthy Herds.

Exciting offers on KRONE mowers, tedders, rakes and round balers, including several new models. Find your savings at your local KRONE dealer here www.offers.krone-northamerica.com.

Bovamine® Dairy Plus

When you feed BOVAMINE® Dairy Plus to your herd, you're putting the power of good bacteria to work. Daily feeding of BOVAMINE Dairy Plus supports normal functions of the rumen and intestinal tract — digestion, absorption, barrier functions and immunity — and keeps your cows healthy and productive. It's the power of good bacteria at work. For more information scan this QR code or see our ad on page 444.

The Endura-Flo joins the Valmetal silo unloader line up! With its heavy construction, improved auger and blower, this model is a high capacity, reliable silo unloader. Its blower is made of 1/4" (6 mm) stainless-steel wrapper and stainless-steel sides for more durability. Both unloader and distributor, this Endura-Flo is characterised by its powerful auger drive and hexapod suspension, always ensuring a perfectly level silage surface. See all the product details and its benefits on our website: <https://valmetal.com/equipment/silo-unloaders-and-forage-blower/hd-drive-silo-unloader>.

Axiota® discovers, develops, and commercializes scientifically proven products, such as Multimin® 90 and Lactipro®. Axiota's non-antibiotic solutions support dairy producers' goals of optimal health, performance, and animal well-being. To learn more, visit www.axiota.com.

Checkoff Partnerships Deliver

For every dollar checkoff spends on partnerships with leading restaurants, those restaurants invest 10x in advertising.

CALF-TEL'S NEW XL XTRA What is the X Factor? Calf-Tel has redesigned the 35185 XL calf hutch with XTRA features you've been looking for. Have your hutch, your way with fully customizable features that will reinvent how you manage your calf operation. An all-plastic extrusion base makes the XL XTRA virtually indestructible, while the XL Mega Vent, largest adjustable ventilation opening on the market, allows for maximum airflow, breathability and comfort! Calf-Tel.com.

Research confirms the role of dietary phosphorus in hypocalcemia. New UW-Madison research showed that cows fed X-Zelit had higher blood calcium concentrations and lower blood phosphorus concentrations during the transition period compared to a negative DCAD diet and a control diet. Also, cows fed X-Zelit had higher colostral IgG concentrations and older cows (3+ lactations) produced more milk. Take the negativity out of your prefresh pen and benefit from improved health and performance. Visit Protekta.com.

MilchMobil NEXT. More of everything. Milk trolleys make calf feeding easy. With the MilchMobil NEXT, Förster-Technik presents a new product generation with many improvements for practical use. Worldwide unique innovations, such as the Clean & Fill Station for fully automatic cleaning and water filling, have been combined with proven Förster-Technik concepts. This means that you can now feed even more conveniently, animal-specifically, hygienically and quickly. Find more information on our website. <https://www.foerster-technik.com/calf-feeding/milchmobil-next/>.

Feed the Strategy that Does More™. Our fully acidogenic transition diet program not only helps optimize calcium metabolism but can help you see a return in dollars, in performance and in the overall health of your herd. See the advantages of Animate® at PAHC.com/Animate or call 217.257.8116.

BONSILAGE CORN+ and SPEED C contain proven combinations of LAB to create distinctive fermentation patterns to improve the ensiling process of High-Moisture Corn. This advantage is in particular based on the preminent adaptability to high dry matter ranges of the selected *L. buchneri* strain and the unique metabolism of *L. diolivorans* to work early on in fermentation. Both products release sufficient amounts of acetic acid, a fermentation acid that provides aerobic stability in high moisture corn silages.

Levucell[®] SC

LEVUCCELL[®] SC, *Saccharomyces cerevisiae* CNCM I-1077 is the only naturally occurring, rumen-specific active dry yeast probiotic designed to optimize digestive function, boost fiber digestion, and maintain proper gut microbiota. When added to the diet of lactating dairy cows, LEVUCCELL SC enhances feed efficiency and increases fat-corrected milk yield like no other yeast can. Learn more and discover the right formulation for your herd at ChooseLevucellSC.com.

HOARD'S DAIRYMAN FARM CREAMERY

PORT ATKINSON, WI

Hoard's Dairyman Farm Creamery cheese is crafted with milk from one of the most storied dairy herds in the country. It is the oldest continuously registered Guernsey herd in North America and through the decades has been a consistent award winner for breed excellence and quality milk production. We are proud of our dairy cows and the milk they provide for our extraordinary cheese, and we're privileged to be carrying on the tradition of excellence W. D. Hoard established in 1899. www.HoardsCreamery.com.

Shearwell is a family run, farmer owned business that is committed to supporting hard working ranchers with robust, reliable products. We supply visual and USDA approved electronic tags, readers, apps, weighing equipment, and a range of dairy husbandry products. Looking for a management, electronic or feedlot tag? You can trust Shearwell to supply quality tags with a quick turnaround. FREE applicator offer with your first tag order from Shearwell. Reach out to find out more. Call 1-800-778-6014 www.shearwell.com.

Methionine, an essential nutrient, is typically the foremost limiting amino acid influencing the performance and profitability of dairy cows. Meeting methionine requirements results in heightened production, improved metabolic health, and enhanced reproductive performance. Smartamine[®]M, Adisseo's rumen-protect methionine with a unique pH-sensitive polymer, shields the amino acid during rumen passage, guaranteeing its release in the abomasum and efficient absorption in the small intestine. Learn how to protect your margins and calculate IOFC with Smartamine[®]M at Milkpay.com.

Learn How to Protect Your Margins with... **Smartamine[®] M**

Enhance the efficiency and profitability of your dairy operations.

Fight Bac[®]

IF YOU HAVE COWS...you need Fight Bac – the most effective disinfectant for teats post-milking, plus cuts and wounds, injection sites, calf navels and udder rot (when nothing else works). Producers are not only seeing excellent results with Fight Bac as an effective and affordable teat disinfectant, but also as a general use disinfectant around the farm. If you have cows, you need a can in every corner. Learn more: World Dairy Expo Booth EH1609, www.FightBac.com.

We all recognize the signs of Coccidiosis when it rears its ugly head with the bloody diarrhea. But, it is estimated that most production losses are subclinical. That's why many times Coccidiosis is referred to as the "Forgotten Disease" or others will call it the "Silent Thief" even though it is estimated that dairymen have production losses in the millions of dollars per year from coccidia. www.huvepharma.us.

Superior Innovation. Exceptional Service.

Udder Tech celebrates 30 years as the industry leader for designing practical, affordable workwear. Red made a splash as the newest color for Udder Tech bibbed overalls at the beginning of 2024. Udder Tech bibs are great for many jobs on or off the farm. They are made from a lightweight waterproof fabric that can be machine washed and dried. Join in the celebrations at World Dairy Expo with a few special promotions at the booth.

CELEBRATING 30 YEARS OF SUPERIOR INNOVATION & EXCEPTIONAL SERVICE

PIONEER[®]

With over 95 years' worth of industry expertise, the complete forages package from Pioneer delivers unrivaled performance. The proven genetics inside each bag of Pioneer[®] brand corn silage products, including Bovalta[®] BMR hybrids, offer results that match your needs and help maximize production. Discover more at Pioneer.com/Forages.

A successful and profitable lactation for today's cow requires the strongest start possible. Stop accepting that your fresh cows have only one challenge. Use YMCP[®] Vitall or any of the YMCP family of products to prepare your herd for a successful lactation and take your cows Beyond the Accepted[™]. <https://www.techmixglobal.com/dairy/prep305/>.

Yea-Sacc 1026 BAC: a cost-effective solution to improve rumen efficiency and gut health. A healthy intestinal tract, including a high-functioning rumen, is critical for dairy operations to take advantage of the benefits of good management and feeding programs. Yea-Sacc 1026 BAC combines the proven rumen modifier Yea-Sacc 1026 with the combined powers of *Bacillus licheniformis* and *Bacillus subtilis* to optimize total gut health and efficiency.

Product Spotlight **HOARD'S DAIRYMAN**

GET TUFF ON MILK QUALITY

Tuffy milk filters are research proven to provide the best milk filtration. Our unique non-woven fabric is engineered specifically to capture and hold more sediment and maintain more milk flow than any other filter on the market. Plus, Tuffy filters last longer so you don't have to change them out as often, saving you time and money. Take the Tuffy Test and improve your milk quality. www.MilkingTuff.com, WDE Booth EH1108

Posilac is the most researched animal product ever to be approved by the Food and Drug Administration (FDA). Posilac increases milk production an average of 10 pounds per supplemented cow per day. Response starts in a matter of days following the initiation of supplementations. If you want to produce milk with **PRODUCTIVITY** for herds, **PROFITABILITY** for your business and **SUSTAINABILITY** for the world.

The Press Screw Separator PSS by FAN covers a broad spectrum of applications, from agriculture over biogas and bioethanol plants and food processing to the chemical industry. The innovative technology separates sewage in its solid and liquid elements. The secret of the versatility of the Press Screw Separator PSS is that it can adjust to different dry matter contents. Compared to conventional separation systems the PSS is time and cost efficient. www.fan-separator.de/en/products/separator-pss.

SHADY LANE
Curtains LLC

Complete Curtain Systems with extra-durable curtain material, heat-welded in our own facility, custom manufactured for your project. Coupled with our own hardware and drive systems for year of great sidewall performance. Ask about curtain automation. We manufacture, deliver, and install the best custom curtain systems in the industry! All our curtains come with a 7-year warranty; we strive on supplying you with the best product for your facility. Learn more ShadyLaneCurtains.com.

Saving on feed- and fuel cost; the advantages of stationary feed mixers

Efficiency, accuracy, consistency and large capacity are the key advantages of stationary mixing. With automatic or manual control, there is a solution for every farm. Our stationary mixers are 100% electric driven and come with programmable frequency drives, providing you with the highest energy efficiency possible. Check out our stationary program: www.trioliet.us.
